

## Vet Direct Safety Net: What Horse Owners Need to Know

Would \$600 help with an emergency vet bill?

The Vet Direct Program is designed to help owners in need pay for emergency procedures, like:

- Colic that can be managed on the farm (non-surgical)
- Stitches or staples
- Wound management
- Choke
- Eye issues
- Neurologic impairment
- Diagnosis of endocrine issues
- Euthanasia and disposal, if recovery is unlikely

Think your horse might be candidate for the program? Contact your vet to ask if they're enrolled in the Vet Direct Safety Net – the process is simple!

It cannot be used for:

- Colic surgery
- Vaccinations
- Ongoing medication needs

Need more info? If you are a U.S. AAEP member interested in learning more about the program and how to onboard to participate, please contact Sue Stivers at (859) 233-0147 or [sstivers@aaep.org](mailto:ssstivers@aaep.org).

*(Note: this program is open only to U.S. AAEP members and U.S. resident clients)*
